ABSTRAK

Upaya untuk menurunkan AKI dan AKB adalah dengan cara menerapkan asuhan kebidanan berkelanjutan atau disebut *Continuity Of Care (COC)* dengan tujuan meningkatkan kualitas pelayanan kebidanan yang membutuhkan hubungan terus-menerus antara pasien dengan tenaga profesional kesehatan. Asuhan yang diberikan kepada Ny. L usia 23 tahun dengan menerapkan managemen *varney* meliputi: pengkajian, interpretasi data, diagnosa potensial, antisipasi/tindakan segera, perencanaan, pelaksanaan dan evaluasi. Asuhan *continuity of care* pada masa kehamilan, persalinan, nifas, bayi baru lahir dan bayi pada Ny. L usia 23 tahun P₁A₁ telah berhasil diberikan, dibuktikan dengan keadaan ibu dan bayi baik. Semua keluhan dan masalah kebidanan Ny. L telah teratasi dengan baik. Semua asuhan sudah dilaksanakan sesuai teori, dan tidak ditemukan kesenjangan antara teori dan praktek di lapangan

Kata Kunci: Asuhan berkelanjutan, *Varney*

ABSTRACT

Efforts to reduce Maternal Mortality and Infant Mortality are by implementing continuous midwifery care or what is called Continuity Of Care (COC) with the aim of improving the quality of midwifery services which require continuous contact between patients and health professionals. The care given to Mrs.L, 23 years old, applies Varney management including: assessment, data interpretation, potential diagnosis, anticipation/immediate action, planning, implementation and evaluation. Continuity of care during pregnancy, childbirth, postpartum, newborns and infants for Mrs. L, 23 years old, P1A1 has been successfully administered, as evidenced by the good condition of the mother and baby. All complaints and obstetric problems Mrs. L has been resolved well. All care has been carried out according to theory, and no gaps were found between theory and practice in the field

Keywords: *Continuous care, Varney*
